

# ioMirror E3210

## Ethernet Peer-to-Peer I/O Server 8 Digital Inputs, 8 Digital Outputs

### Features

- > Remote digital input mapped to local digital output over Ethernet
- > High speed peer-to-peer I/O
- > Copy sensor signals to up to sixteen locations
- > Quick and easy utility and web-based settings
- > Local alarm and remote alarm message
- > Support Modbus/TCP for remote monitoring

### : Introduction

#### Direct input-to-output communication over IP

The ioMirror E3000 Ethernet I/O server is designed as a cable-replacement solution that connects remote digital input signals to output signals over an IP network. The ioMirror E3210 provides 8 digital input and 8 digital output channels and a 10/100M Ethernet interface. Up to 8 pairs of digital input and output signals can be exchanged over Ethernet with another ioMirror E3210 as well as to a local PLC or DCS controller. Over a local area network, the ioMirror achieves low signal latency, typically 20 ms. With ioMirror servers, remote sensors can now be connected to local controllers or display panels over copper, fiber, or wireless Ethernet infrastructures. Signals can be transmitted over virtually unlimited distances, without noise problems.

#### Split sensor signals to sixteen different locations

The ioMirror E3000 can split one input signal to two digital output channels at two different IP addresses. Eight tank level signals could be monitored at sixteen different display panels at the same time.

#### Local alarm with remote alarm messages to monitor connectivity

The ioMirror E3210 has a 24 VDC alarm output channel that can activate an attached buzzer or display LED when the connection fails. In addition, both ioMirror modules can send messages to the event log software. This ensures that at least one of the warning messages will reach the event log software.

### : Specifications

#### LAN

**Ethernet:** 10/100 Mbps, RJ45

**Protection:** 1.5 KV magnetic isolation

**Protocols:** Modbus/TCP, TCP/IP, UDP, DHCP, Bootp, SNMP(MIB for I/O and Network), HTTP, SNTP

#### Power Requirements

**Power Input:** 24 VDC nominal, min 12 VDC, max 48 VDC

**DO Power:** 24 VDC nominal, up to 36 VDC

#### Mechanical Specifications

**Wiring:** I/O cable max. 14 AWG

#### Environmental

**Operation Temperature:** -10 to 60°C (14 to 140°F), 5 to 95% RH

**Storage Temperature:** -40 to 85°C (-40 to 185°F), 50 to 95% RH

#### Digital Input

**Inputs:** 8, source type

**I/O Mode:** Digital Input

**Dry Contact:** Logic 0: close to GND  
Logic 1: open

**Wet Contact:** Logic 0: 0 to 3 VDC  
Logic 1: 10 to 30 VDC

**Isolation:** 2 KVrms

**Common Type:** 8 points/1 COM

**Stored Counter Value:** Yes

#### Digital Output

**Output:** 8, sink type

**I/O Mode:** Digital Output

## Specifications

**On-status Voltage:** 24 VDC (typical)  
**Output Current Rating:** Max. 200 mA per channel  
**Optical Isolation:** 2 kVrms/3K VDC  
**Protection:**  
 Over Voltage Protection: +50 VDC  
 Over Current Limit: 600 mA (typical)  
 Over Temperature Shutdown: 160°C (min.)

### Alarm Port Output

**Output:** 1, sink type  
**On-status Voltage:** 24 VDC (typical)  
**Output Current Rating:** Max. 200 mA per channel  
**Optical Isolation:** 2 kVrms/3K VDC

### Agency Approvals

**EMI:** FCC part 15, CISPR (EN55022) Class A  
**EMS:** IEC 61000-4-2 (ESD), Level 2/3  
 IEC 61000-4-3 (RS), Level 2  
 IEC 61000-4-4 (EFT), Level 2  
 IEC 61000-4-5 (Surge), Level 3  
 IEC 61000-4-6 (CS), Level 2  
 IEC 61000-4-8 (PM), Level 1  
 IEC 61000-4-11 (DIP)  
 IEC 61000-6-2  
 IEC 61000-6-4 (EMC)

**Safety:** UL 508

**Shock:** IEC 60068-2-27

**Freefall:** IEC 60068-2-32

**Vibration:** IEC 60068-2-6

**Warranty:** 2 years

## Pin Assignment

### Power and RS-485

(Power Input)		
1	2	3
V+ (12-48 V)	V-	FG

### I/O (left to right)
