

RK-4U

19" Rack Mount DIN Rail Adapter

Moxa products that are designed for DIN-rail or wall mounting now have a new mounting option with the RK-4U. The RK-4U is a special mounting kit that allows DIN-rail or wall-mounted products to be installed on a 19-inch rack.

The mounting kit consists of a frame and a panel with a DIN-rail attached to it. Devices can be mounted onto the DIN-rail or onto the panel itself, and the panel can be adjusted to the desired depth. The frame has a rugged construction so devices will be securely mounted within a 19-inch rack cabinet. . The assembled kit is 4U in size.

The RK-4U comes disassembled with all required parts neatly packed. Assembly is simple and can be completed in just a few minutes.
