

1.25G Gigabit SFP Optical Module

Product description

Maiwe Gigabit SFP Optical Module is suitable for fiber optic communication applications at rates up to 1.25G. The module integrates the two parts of the receiving and transmitting circuit, and adopts the all-metal housing and the LC port with the plastic tail plug. It has the function of "hot plugging". It can be inserted and removed from the device when the device is continuously powered, which is suitable for switching environment in the metropolitan area network. Maiwe Gigabit SFP Optical Module uses a +3.3V power supply, and the input/output signals are LVPECL level. The product complies with the MSN (Multi-Source Agreement) of SFP protocol.
