Introduction

The ioThinX 4530 Series is an advanced modular controller product with a unique hardware design, making it an ideal solution for a variety of industrial data acquisition applications. The ioThinX 4530 Series has a unique mechanical design that reduces the amount of time required for installation and removal, simplifying deployment and maintenance. In addition, the ioThinX 4530 Series supports Moxa Industrial Linux and a built-in Azure/AWS/Alibaba cloud SDK so that users can easily save field data to different cloud accounts.

Easy Tool-free Installation and Removal

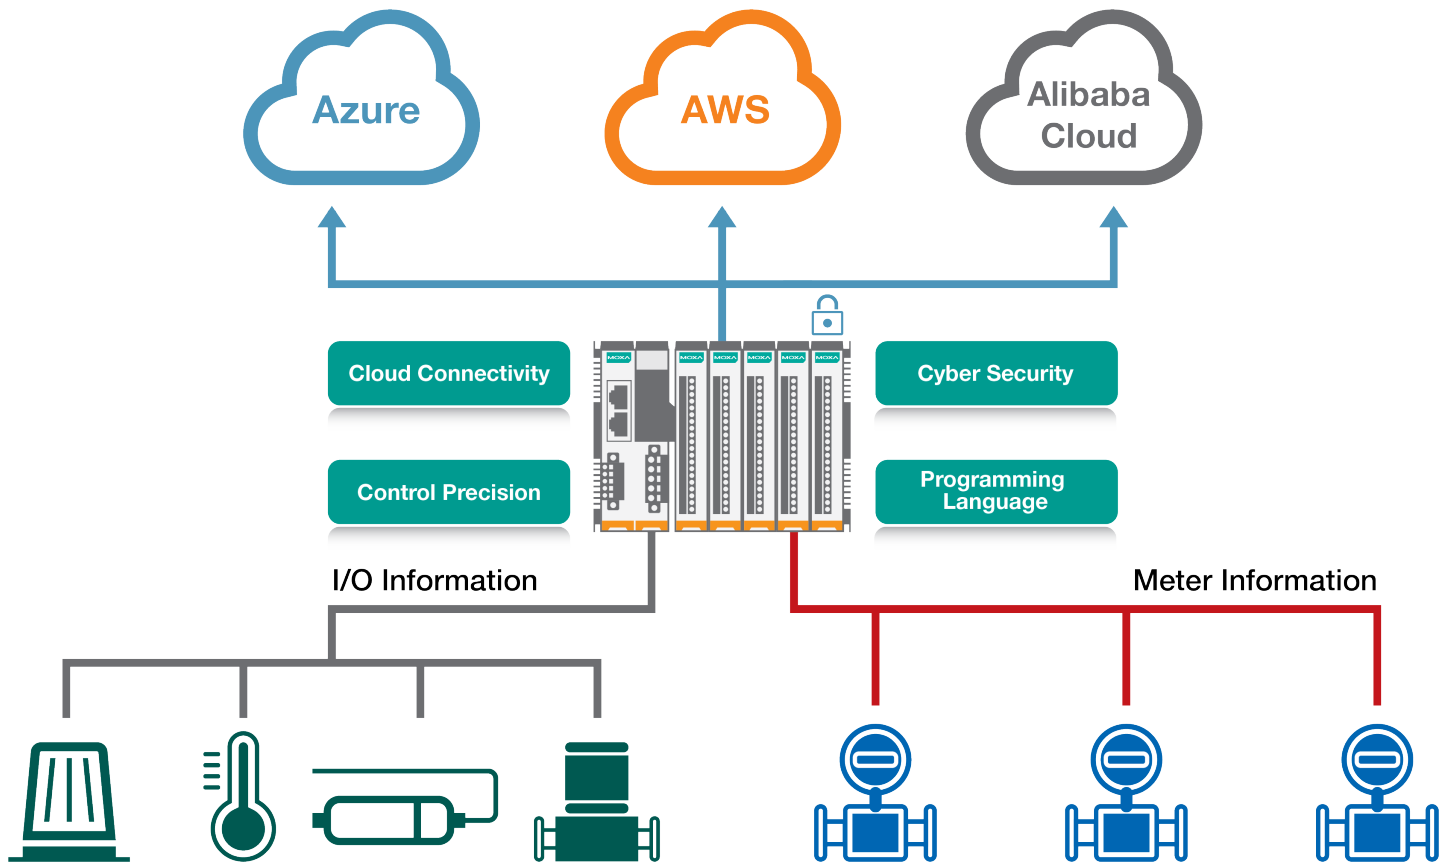

The ioThinX 4500 Series has a unique mechanical design that reduces the amount of time required for installation and removal. In fact, screwdrivers and other tools are not required for any part of the hardware installation, including mounting the device on a DIN-rail, as well as connecting the wiring for both communication and I/O signal acquisition. Furthermore, no tools are required to remove the ioThinX from a DIN-rail. Removing all of the modules from a DIN-rail is also easy using the latch and release tab.

Unmount single modules easily with a push and unlock design

Built-in Azure/AWS/Alibaba Cloud Library

Saving field site data to the cloud to improve Overall Equipment Effectiveness (OEE) or implement predictive maintenance is an important aspect of IIoT or Industry 4.0 applications. To help users to connect to the cloud more easily, the ioThinX 4530 series has Azure/AWS/Alibaba cloud SDKs built in, saving engineers a lot of time on developing cloud connectivity applications.
