Catalog 101 Optional Extras and Enclosures

08/2013

Kraus & Naimer

The development of the Blue Line rotary switch, contactor and motor starter product ranges is based on more than hundred years experience by Kraus & Naimer in the design and manufacture of electrical switchgear. Kraus & Naimer pioneered the introduction of the cam operated rotary switch and continues to be recognized as the world leader in that product field.

BLUE LINE

Blue Line products are protected by numerous patents throughout the industrial world. They are built to national and international standards and designed to withstand adverse temperatures and climates.

Blue Line products are accepted and universally recognized for their quality and workmanship. They are supported by a worldwide sales and service organization.

| Blue Line Switchgear: Summary | 44 | - |

Construction Data

The large cam switch line of the A, C, CA, CAD, CG, CH, CHR, D, L and X-series is complemented by a large number of optional extras and enclosures.

This substantial number of optional extras and enclosures is needed in order to meet the requirements of the world market.

One or more optional extras may be used in combination with any one switch provided they are of the same switch size. A few exceptions where this cannot be accomplished are noted on the following tables. In some cases, for technical strength or esthetic reason, it may be desirable that a switch be combined with an optional feature of the next larger switch size. Many options provide for such a possibility.

Enclosures are manufactured from plastic or aluminum material. They offer a high degree of protection (up to IP 66/67) thereby permitting switch operation under adverse environmental conditions. The materials used provide considerable strength and the best possible protection against corrosion. A large number of possibilities exist for combining switches, enclosures and appropriate optional extras.

How to order

Disconnectors and Main Switches with Optional Extras acc. to IEC 60947-3 see Catalog 500

When ordering Blue Line cam switches with optional extras, the following method of coding is required. Details on the enclosures and optional extras are shown in this catalog.

1. Switch Type

See Catalog 100, 110, 120, 130 or DC-Switch G20/G20S.

2. Switch Function

See Catalog 100, 110, 120, 130 or DC-Switch G20/G20S.

3. Type of Mounting

See Catalog 100, 110, 120, 130 or DC-Switch G20/G20S.

4. Enclosures

The assigned code numbers for the various enclosures are shown in this catalog on pages 23-25.

CA20B

**A202
V840G/**

PN

5. Optional Extras

Pages 4-22 list optional extras and their coding. A ● indicates the switch sizes in which the optional extra shown is available.

Possible combinations of switches of the same switch size with an optional extra of the next larger switch size are indicated by a ●. Only in this case indicate the next larger switch size in front of the coding.

There are some optional extras in existence which are available in a variety of programs. Additional ordering data may, therefore, be required. In the above case, a color description is required for the cover and handle disc.

Standard Door Clutch

Dimensions S.28

With shaft extension, shaft with unlimited adjustable length
 shaft fixation with set screw
 Front protection IP 40
 Front protection IP 66/67

Door clutches M700/M701¹

Handle lockable with padlocks
 Protection IP 66
 The escutcheon plate is available in black, yellow and alu.
 The handle may be supplied in black and red.

Dimensions S.28

Standard handle and standard escutcheon plate Protection IP 65

The M700/M701 is a padlock door clutch and a mechanical interlocking safety device. Using the device the electrical panel may be opened only when the switch is in the OFF position and no padlock is fitted. Note: Only in the ON position can knowledgeable personnel using a simple tool to defeat the interlock. The M700's flexibility allows for successful installation with as much as + or - 5 mm of misalignment between the shaft and door.

Unlock insert for the M700 ff.
 To open the door in ON-position. (After the locking has been made inactive, it is necessary to take effective precautions against an opening of the door by unauthorized persons.)

Dimensions S.28

Door clutches M800/M810.¹

Door clutch utilizes a simple and robust design and features a compact size. It has an interlock in the ON-position while a padlock can be fitted in the OFF-position. The door clutch may be opened only if the switch is in the OFF-position. In special cases, however, authorized people have a requirement to open the door, even if the switch is in the ON-position. Further characteristics are the single hole mounting with IP 66/67 protection degree, as well as the Accepted Misalignment up to ± 3 mm horizontally and ± 5 mm vertically. Maximum 3 padlocks with a minimum shackle diameter from 5 up to 8 mm are possible.

Ordering data: Dimension from face of the switch to the cover or dimension from mounting surface to cover as well as the interlock program and the color selection.

| | <p>Spring return from one side</p> <p>Spring return for angular displacement up to 30° can be accomplished by using the latching mechanism only. If a large number of contacts must be opened simultaneously or a total angular displacement is larger than 30° over which the spring return is operational, the switch must use one of the spring return devices.</p> <p>Spring return from both sides can be designed to permit maintained position on each side of center.</p> | | <p>M470</p> | ● ● | ● | |
| Ordering data: | For M470, specify spring return from either left or right side and details of maintained positions, if required. | | | | | |

Uni-directional Interlock

| | | | | | | |
|--|--|--------------------|---|---|---|---|
|  | <p>The uni-directional interlock prevents the switch from being operated counterclockwise. The interlock may be in either all positions or in pre-determined positions only.</p> | <p>M400</p> | ● | ● | ● | ● |
| Ordering data: | Specify which positions should be interlocked. | | | | | |

Slip Clutch and Ratchet Coupling

| | | | | | | |
|--|---|--------------------|--------------------|---|------------------------------------|--|
|  <p><i>Dimensions S. 32</i></p> | <p>Slip clutch</p> <p>Using the slip clutch, two cam shafts can be coupled in such a way so that the secondary cam shaft will operate only after the primary cam shaft has been moved over a pre-determined angle. This slip clutch allows e. g. the de-energized changing back of switches for pole-changeable motors. Not available for D-switches.</p> | <p>M200</p> | ● | ● | | |
| | <p>Ratchet coupling</p> <p>A ratchet coupling attaches to the rear of the switch. Additional stages are then attached behind the coupling device which serves to operate that portion of the switch only when the handle is turned counterclockwise. When the handle is turned clockwise, the rear switch portion remains in the same position.</p> | | <p>M230</p> | | CA40 CA50 CA63 C26 C32 | |

Various key positions and locking programs are available.

Key positions:

Key can be removed in locked and unlocked positions.

Key can be removed only in locked positions.

Locking programs:

| Locking Program No. | Switching Angle | Switch Positions | | Size |
|---------------------|-----------------|------------------|--------------------------|--------|
| | | To be locked | Not to be locked | |
| 1 | 30°-90° | one | the balance | S0-S3 |
| 2 | 20° | all | none | S1, S3 |
| | 30°-90° | | | S0-S3 |
| 3 | 30°-90° | the balance | one | S1-S3 |
| 4 ¹ | 30°-90° | one ¹ | the balance ¹ | S0-S3 |

¹Locking program 4 permits the locking of the device in any switch position. However, the actual locking becomes effective in a pre-determined switch position only.

Ordering data: Advise locking program and positions in which the key can be removed.

Padlock Device

Dimensions S. 37

For 1 padlock
with lock bow diameter for 4-5,5 mm.
The handle may be supplied in black and red.

Dimensions S. 37

The padlock is an integral part of the switch handle itself and can hold 2 padlocks
The lock bar is accessible from the bottom. Handle can be sealed in the locked and unlocked positions. The handle may be supplied in black, red and electro-gray.

Dimensions S. 37

For mounting VE2 and VE21 with lock bar accessible from the front. Available in red and electro-gray.

Dimensions S. 37

For 4 padlocks
The lock bar is accessible from the front and may be supplied in black, red and electro-gray.

Notes:

The Range of “Blue Line” Switchgear

Technical literature covering the following products is available on request.

| | Catalog Number |
|--|---------------------------|
| Main Switches and Main Switches with Emergency Function 16 A-315 A Maintenance Switches 20 A-315 A Switch Disconnectors 20 A-315 A According to IEC 60947-3, EN 60947-3, VDE 0660 part 107, IEC 60204, EN 60204 and VDE 0113 | 500 |
| C, CA and CAD Switches 10 A-315 A and L Switches 350 A-2400 A C, CA and CAD switches are designed for universal application. They are recommended for instrument, isolator, double-throw and motor control. L switches are designed for load and off-load applications. They are used to switch resistive or low inductive loads. | 100 |
| Optional Extras and Enclosures The complete product line, a large number of optional extras is available, including door interlocks, push-pull devices, cylinder and padlock attachments, control and indicator devices, AC motor drives, as well as enclosures, both insulated and metal. | 101 |
| A and AD Switches 6 A-25 A A and AD switches have 4 contacts in each switching stage. These switches provide an extensive range of switch functions and require a minimum mounting depth. Up to 24 switching positions are possible, with availability of 48 contacts per 12 stage switch column. | 110 |
| CG, CH and CHR Switches 10 A-25 A Ultra compact CG, CH and CHR switches are ideally suited for control and instrumentation applications. Switch terminals are “finger-proof” and conveniently accessible for wiring and are delivered open. All CG4 switches offer specially designed gold plated contacts or H-bridges with “cross-wire” contact systems, which facilitates their use in electronic circuitry and chemically aggressive environments. | 120 |
| DH, DHR, DK and DKR Switches 6 A-16 A DH, DHR, DK and DKR switches incorporate unique corrosion resistant contacts that permit operation on system voltage as low as 1 V. They have fully enclosed and protected contacts which can be operated either by rotary and/or lateral handle movement. D switches are used in calibration and semiconductor circuits. They are also used for relay and contactor control. | 130 |
| X Switches 200 A-630 A X switches can be applied for load, tap and gang switching duties. They incorporate 6 contacts in each switching stage. Their compact design provides a minimum length dimension for mounting purposes. | 140 |
| KG Switches 20 A-315 A and KH and KHR Switches 16 A-80 A KG, KH and KHR switches are excellent circuit interruptors. They have high through fault and fault making capacities and are especially designed for use as isolators and safety switches for machine tools, distribution panels and switchboards. KG ON/OFF switches offer unusually high dimensioned air and creepage distances between terminals which are designed for time saving “straight-line” wiring. ON/OFF switches are available with up to 8 poles and double-throw switches are available with up to 4 poles. | 150 |
| Push Buttons and Pilot Lights, 22,5 mm Ø A complete range of state-of-the-art push buttons and pilot lights represent an ideal combination of functional security and economical efficiency in a modular design. | 302 |

We reserve the right to make technical and dimensional changes without prior notice.
